MUS 3611: Symphonies of Johannes Brahms (2 credits)

The four symphonies of Johannes Brahms form an essential component of late 19th century orchestral repertory. As symphonic masterpieces, they stand in fundamental opposition to Richard Wagner's and Franz Liszt's "Music of the Future." Although considered by many as a reactionary, Brahms was as aware of contemporary musical innovations as he was of earlier music. The symphonies represent the composer's mature work that blends elements from the musical past with contemporary innovation. Our study of this music focuses on Brahms's reinvigoration of classical theme types and formal architectonics. We will also explore Brahms's progressive use of motive and rhythm, as well as his subtle use of musical reference. In addition to gaining factual knowledge about Brahms and his music, the student will learn to identify music from each of the symphonies, recognize abstract phrase categories and important formal structures, engage in discussion about these concepts and learn to express their ideas in written work. In addition, this course will deepen the student's curiosity about Brahms's relation to several of his musical contemporaries.

Prerequisite(s): MUS 2612 or permission of instructor.

MUS 3612: The Etude as Genre (2 credits)

An etude is generally considered to be a musical composition that develops a specific point of technique. This course explores the historical origins of this genre, its creative maturity during the mid-19th century, and subsequent treatments by late 19th and 20th century composers. Our study will focus on the caprices of Niccolò Paganini and the etudes of Frederic Chopin. Both composers surmount the compositional and aesthetic challenges posed by a genre that served initially a pedagogic function only. Students work individually with the instructor in formulating a paper topic, constructing an outline, writing a draft, and editing a research paper. **Prerequisite(s):** MUS 2612 or permission of instructor.

MUS 3613: The Lied Tradition (2 credits)

The Lied Tradition explores the song settings of Schubert, Schumann, Brahms, Wolf, Mahler and Strauss.

Representative works by each composer are analyzed in great detail, illuminating the varied approach to setting a poetic text in the 19th century. In this course, students will sharpen their analytic skills and study major figures in German literature beginning with Goethe and progressing through Romantic poetry and its aftermath. Students will have the opportunity to sing and accompany in class, criticize and learn from recorded performances, and apply their understanding by providing online written assignments that test reading comprehension and completing detailed analyses of four works discussed in class. A take home final exam will consist of two short essays and a score analysis. **Prerequisite(s):** MUS 2612 or permission of instructor.

MUS 3614: Survey and Analysis of Twentieth-Century Music (2 credits)

Survey and Analysis of Twentieth-Century Music introduces students to a varied selection of influential composers whose major works were composed in the twentieth century. The repertory studied in this class range from 1886 to 1980. In addition to learning basic biographical information about each composer, students will encounter differing approaches to musical composition characteristic of the modern era. Some of the musical approaches explored in this class include transitional, free atonal, serial, poly- or neo-tonal and post-structural techniques. Students learn to identify each of these approaches in specific compositions and recognize them in other twentieth-century works. Students will also acquire a theoretic terminology to speak and write intelligently about twentieth-century music. Most importantly, students will listen actively to a rich and varied musical repertoire. **Prerequisite(s):** MUS 2612 or permission of instructor.

MUS 3615: Music Since 1945: Challenges to Serialism (2 credits)

With the publication of the article "Schoenberg is Dead," Pierre Boulez articulates both a critique of Arnold Schoenberg's 12-tone serialism and offers a new vision for the future. Music Since 1945: Challenges to Serialism explores several post-war musical trends that either extend or reject aesthetic principles posited by the Second Viennese School. Students in the class study works by major composers from the second half of the 20th century, learn to identify stylistic features, and practice writing critically about modern music from 1945 to the present. **Prerequisite(s):** MUS 2612 or permission of instructor.

MUS 3616: Fugues of J.S. Bach's Well-Tempered Clavier (2 credits)

Fugues of the Well-Tempered Clavier offers performers and composers an opportunity to study one of Bach's monumental achievements. Analysis of Bach's fugal writing reveals his contrapuntal, motivic, and formal ingenuity that served as a model for subsequent composers. By the end of the course, students will have the ability to identify the exterior features of Bach's fugues, recognize instances of invertible counterpoint, and execute a harmonic analysis in a densely contrapuntal texture. **Prerequisite(s):** MUS 2612 and permission of instructor.

MUS 3617: Introduction to Schenkerian Analysis (2 credits)

The analytic method of Heinrich Schenker holds special relevance for performers. More than just a cognitive way of understanding music, Schenkerian analysis offers a hierarchical approach to musical listening and performance. Experiencing music as a synthesis of foreground, middleground, and background structures, performers experience a deeper level of musical expression not readily apparent even after many hearings. These insights can shape musical performance in original and compelling ways. By the end of the course, students will be able to relate complex musical surfaces to a simpler harmonic and contrapuntal framework. In addition to completing exercises in rhythmic and voice leading reductions of short musical passages, the student will learn how both small and large musical forms may be conceived as a single linear impulse. **Prerequisite(s):** MUS 2612 or permission of instructor.

MUS 3619: Debussy, Stravinsky, and the Rise of Musical Modernism (2 credits)

The lives of Claude Debussy (1868 - 1918) and Igor Stravinsky (1882 - 1971) overlap at a significant point in the early compositional development of the younger composer. In the ten-year period between 1908 and 1918, Stravinsky formulated a visceral harmonic and rhythmic language characteristic of his music. This course explores several works by Debussy that Stravinsky used as compositional models in his early music and the pre-war ballets of the Russian Period (Firebird, Petrushka, and The Rite of Spring). Working with basic scalar constructs, each composer found his own solution to the aesthetic issues posed by late romantic music. Moreover, certain compositional features of Stravinsky's youth persist in his neoclassic and atonal music, thereby unifying this composer's distinct compositional voice. By the end of the course, the student will be able to articulate key historical and stylistic differences between late romanticism and early modernism, gain experience analyzing music in a post-tonal idiom, identify and recognize important musical works by Debussy and Stravinsky, and achieve greater fluency in reading orchestral scores. **Prerequisite(s):** MUS 2612 or permission of instructor.

Although the course primarily focuses on music before c. 1750, performance practices up through the early 19th century will also be explored. Students will develop an intellectual and experiential framework for making historically informed decisions in musical performance. Through reading, class discussion and listening, hands-on music making, and a term-end performance project, students will gain knowledge of such topics as expression, gesture, and phrasing; articulation, bowings, tonguings, and fingerings; melodic ornamentation and embellishment; vocal production; developments in instrument making; tuning and temperament; notational formats; continuo practices; and improvisation. Assessment will be based on class participation, a bibliography project, and a term-end lecture-performance. **Prerequisite(s):** MUS 2711 or permission of instructor

MUS 3713: Chamber Music of the Classical and Romantic Eras (2 credits)

This course addresses the development of instrumental chamber music between 1750 and 1900, with a primary emphasis on string chamber music in the Austro-German tradition (including music with piano, clarinet, or other instruments). Enrollment permitting, the primary mode of instruction will be live performance and group analysis. Students will develop the ability to explicate orally the style and structure of chamber music and will gain understanding of individual composers' styles and the historical development of chamber genres. In addition to the primary emphasis on style analysis, we will also address the social contexts of chamber music. Assessment is based on class participation as well as listening and written examinations. **Prerequisite(s):** MUS 2711 and MUS 2712 or permission of instructor.
